BINARY DEFENSE

BD Platform

A unified Managed Detection & Response platform designed to enable security teams to collaborate across investigations and manage response activities to prioritize response and manage risk.

The meticulously crafted BD Platform provides our customers with a seamless and intuitive Managed Detection and Response service. With a focus on customization, real-time insights, and collaborative engagement, the BD Platform redefines how you interact with your Managed Detection & Response service. Experience exceptional Managed Detection and Response with the BD Platform.

Key Features:

Unified Experience: Acting as a single pane of glass, the BD Platform offers a unified experience where customers can interact with the Binary Defense Security Operations Center effortlessly. From high-priority alerts to collaborating on active investigations, everything is centralized for ease of access and enhanced efficiency.

Contextual Alert Mapping: BD Platform maps all alerts and events by reporting sources into an investigation. This mapping provides visibility into the origin of alerts, their placement on the Cyber Kill Chain®, and their potential impact on security posture.

Efficient Investigation Management: Manage investigations efficiently through the BD Platform's intuitive interface. Customers immediately can see investigations based on severity, track progress, and collaborate seamlessly with our SOC team to resolve threats swiftly and effectively.

Streamlined Incident Response: Leveraging the BD Platform's investigation management capabilities, customers can streamline their incident response processes. From detection to escalation and resolution, every step is optimized for efficiency and effectiveness.

Empowering Insights: The BD Platform provides actionable insights into critical metrics such as Mean Time to Detect, Mean Time to Investigate, and Mean Time to Resolve. These insights empower customers to optimize their threat response processes, minimize impact, and mitigate risks effectively.
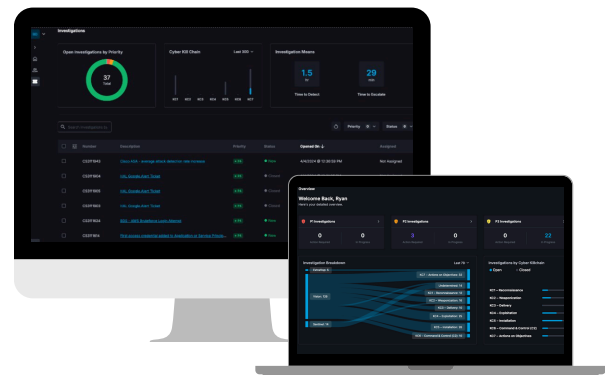

Immediate Benefits

Actionable insights for data-driven decision-making and strategic planning.

Real-time threat tracking and optimization of response processes.

Efficient investigation management and collaboration with the Binary Defense teams.

Proactive alert mapping for enhanced threat visibility and response.
