DATASHEET

MDR Plus

Enhance Your Comprehensive Security Operational Coverage

MDR Plus focuses on delivering superior security outcomes through Binary Defense's BD Platform. This solution integrates real-time detection and containment with sophisticated behavior-based threat detection and managed deception capabilities, ensuring rapid identification and neutralization of threats. Customers benefit from industry-leading observability, contextual feedback, early-stage attack detection, and advanced malware disruption.

Binary Defense's ongoing investments in its BD platform have culminated in three key features for MDR Plus: patent-pending Malware Disruption, AI-powered Managed Deception, and seamless telemetry configurability that allows for flexible updates to threat intelligence and detection logic without the need for software changes.

Uplevel Your Security Program with MDR Plus

	Managed Detection & Response	
	CORE	PLUS

Identity Safeguard Response		✔
Telemetry Configurability		✔
EDR Bypass Detection		✔

Key MDR Plus Benefits

MDR Plus includes all of the MDR Core services, plus:

Malware Disruption

- Disrupts common attack chains without impacting legitimate computing processes
- >90% detection rate when tested on a wide array of Command and Control tools

Managed Containment

- Contain endpoints operating on Microsoft, Linux, and Mac environments.
- Deploy playbooks for swift containment to mitigate threats

Identity Safeguarding

- Reduce MTTR by shutting down compromised accounts via domain controller.
- Strengthen access controls by leveraging our MDR sensor to quickly address compromised accounts and prevent further malicious activity

EDR Bypass Detection

- Provides an additional layer of defense by actively monitoring for signs of evasion
- Increases visibility by adding a robust layer of detection even when conventional tools are being attacked or evaded

Managed AI Deception

- Our experts generate AI-powered simulated environments and exposures to deceive attackers
- Deceptive measures are deployed across the attack chain to safegaurd your assets and data
- Outmaneuver attakers while triggering cirtical alerts for immediate response

Behavioral-Based Detections

- Proprietary behavioral-based detections leverage multiple sources to correlate indicators of compromise and attacks often missed by signature-based detections
- Effectively terminate both file-based and file-less malware, detect malicious network connections, monitor lateral movement, identify persistence hooks, and much more

Telemetry Configurability

- Flexible detection capabilities enable seamless integration of the most advanced detection logic and threat intelligence
- Real-time adaptability and enhanced protection without the need for disruptive installations

About Binary Defense

Binary Defense is a trusted leader in security operations, supporting companies of all sizes and industries to proactively monitor, detect and respond to cyberattacks. The company personalizes a Managed Detection and Response solution, including advanced Threat Hunting, Digital Risk Protection, Phishing Response, and Incident Response services, helping customers mature their security program with confidence.
